Learning Outcome:

ICAP is entrusted with the regulation of the auditing profession in Pakistan. It is one of the foremost priority of ICAP to provide opportunities for improvements in quality of audit and capacity building of audit firms of the country. In line with that vision, ICAP issued a directive 4.29 in which the use of audit software was made mandatory for audits of Public Interest Companies for financial year ending June 30, 2024. Further ICAP facilitated its members in obtaining audit software to increase the efficiency and productivity of the audit process, including risk assessment, scheduling & planning fieldwork & review etc. by arranging discounted prices with couple of software vendors. Members are however can use any audit software compliant with International Standards on Auditing (ISAs).

This session will be led by trainer from one of the leaders of such audit software vendors. The SMP committee felt that a session of detailed understanding of audit software is direly needed for small and medium audit firms' staff. We are hopeful that we will have a good session of learning and members will have an opportunity to ask any questions in this regard.

Agenda:

Time	Program	Speakers
