OVERVIEW:

Join us for an exclusive webinar organized by the US-Canada Chapter of the Institute of Chartered Accountants of Pakistan (ICAP) on the **Use of AI & Robotic Process Automation in Finance**. This interactive session will provide finance professionals with insights into how Artificial Intelligence (AI), including Generative AI, and Robotic Process Automation (RPA) are transforming financial operations. The session will include live demonstrations of real-world use cases to enhance understanding and practical application.

AGENDA:

Finance Use of AI in Finance

- Understanding AI & Generative AI applications in finance
- AI-driven financial forecasting, anomaly detection, & decision-making

Agenting AI for Intelligent Automation in Finance

- Integrating AI agents with RPA for autonomous decision-making
- Enhancing efficiency, accuracy, & compliance in financial workflows

Robotic Process Automation (RPA) in Routine Tasks

- Streamlining day-to-day financial & accounting processes
- Case studies on automation of data entry, reconciliations, & reporting

TRAINER PROFILE:

Faizan Irshad

Mr. Faizan Irshad has over 17 years of industry experience and is a Fellow Chartered Accountant (ICAP). He holds an MS in Business Analytics and is a gold medalist in Machine Learning, Deep Learning, and Big Data during his MS studies. He specializes in UiPath Robotic Process Automation (RPA) and is certified in Microsoft Power Platform. Faizan conducts workshops on RPA, Power BI, SQL, Big Data, Generative AI, Python and Agenting AI, at prestigious institutions. He is also an accomplished researcher, having authored papers proposing innovative AI algorithms for Anomaly Detection in financial transactions. In recognition of his contributions, he has been honored with the Professional Excellence Award by ICAP.
