ISQM 1 Training: Practical Implementation of a System of Quality Management (SoQM)

Brief of the Program

This training program is designed to support members in practice particularly small and medium-sized audit firms in effectively implementing the requirements of ISQM 1. The workshop provides a comprehensive and practical walkthrough of all eight components of the System of Quality Management (SoQM), enabling firms to develop, implement, and maintain a robust quality management framework.

Through interactive sessions led by experienced professionals, participants will gain practical insights into key areas such as risk assessment, governance and leadership, ethical requirements, client acceptance and continuance, engagement performance, resource management, information and communication, and monitoring and remediation processes.

The program aims to bridge the gap between theoretical requirements and practical application, equipping firms with actionable guidance, tools, and best practices to enhance audit quality, strengthen compliance, and align with regulatory expectations.

This workshop will be particularly beneficial for firms seeking to operationalize ISQM 1 in an efficient and scalable manner, while improving overall audit quality and sustainability.

Session 1 - Friday, May 8, 2026 (3:00 pm - 7:30 pm)
