Most people earn a salary. Far fewer know how to optimise it.

This talk walks you through the strategies for building savings and making your money work harder through smart investing. No jargon, no complex theory. Just practical steps, solutions and toolkits that you can apply to go from payslip to portfolio. The talk will reveal the secrets to turning a regular salary into a growing investment portfolio.

As a CA, you already understand numbers. This talk sharpens how you see your own. If you want your money to work for you, attending this talk by an industry veteran is a good place to start.
