Non Members: 3,500 (Zoom: 2,000)

*Zoom fee applies to participants from **OTHER STATIONS & OVERSEAS**.

Registration

About the Workshop

Artificial Intelligence (AI) and automation are no longer technologies of the future—they are reshaping the delivery of professional services today. From planning and execution to documentation and review, AI is transforming the way firms operate.

This workshop is specifically designed for Small and Medium Practices (SMPs), providing practical insights into AI-driven tools, real-world applications, and a structured approach to integrating these technologies into everyday practice to improve efficiency, quality and client value.

Building on ICAP's commitment to empowering its members & students with the knowledge, skills and practical tools to harness Artificial Intelligence, and aligned with Pakistan's National AI Policy 2025, this session moves beyond concepts to practical applications and a firm-level AI adoption roadmap.

ABOUT THE TRAINER

Mr. Saad Kaliya, FCA

Partner (AI and Technology Consulting)
A. F. Ferguson & Co. (a member firm of
the PwC network)

Saad Kaliya is a seasoned technology consulting professional with over 30 years of local and international experience in delivering innovative business and technology solutions. As the AI Leader at A. F. Ferguson & Co., he leads the firm's emerging technology capabilities, with a particular focus on Artificial Intelligence (AI) and Big Data Analytics.

He has extensive expertise in digital transformation, technology strategy, cyber risk management, and technology consulting, having successfully led end-to-end transformation initiatives for organizations across the banking, telecommunications, oil & gas, manufacturing, capital markets, FMCG, and multinational sectors.

Throughout his career, Saad has advised numerous leading global and regional organizations on complex business solutions, financial services assurance, and technology-enabled transformation, helping them leverage emerging technologies to enhance operational efficiency, strengthen governance, and drive sustainable business value.

ABOUT THE TRAINER

Mr. Muhammad Ibrahim FCA

Deloitte Ireland
Senior Assurance Leader
Certified Trainer

With over 16 years of international experience across Deloitte firms in Ireland, the UK, Qatar, and Pakistan, he possesses extensive expertise in audit, assurance, accounting, and sustainability across diverse industries. As the Learning Leader for the NSE region, a certified Deloitte Global Train-the-Trainer, an approved facilitator at Deloitte University Paris, France, and an experienced faculty member, he has designed and delivered technical learning programs for professionals across various industries. His training approach blends international best practices with practical insights, enabling participants to confidently apply sustainability frameworks and assurance standards in today's evolving reporting environment.

KEY FOCUS AREAS

1. How AI and automation are transforming the audit profession
2. How leading global firms are using AI and emerging technologies
3. Practical AI tools applications and ready-to-use use cases
4. Opportunities, limitations and risks associated with AI adoption
5. How SMPs can develop a practical and scalable AI adoption plan
6. Steps for integrating AI into existing audit methodologies and workflows

WHY ATTEND

1. Earn four hours of structured CPD learning
2. AI uses cases that are providing efficiency
3. Actionable AI adoption roadmap for your firm
4. Learn leading AI tools and technologies being used by the professional firms
5. Connect with fellow practitioners, technology professionals and industry leaders
6. Identify opportunities to improve efficiency, strengthen audit quality and protect margins
7. Future-proof your firm's services in a rapidly changing professional environment

WHAT SETS THIS PROGRAMME APART

Practical AI Adoption for Firms

Gain a practical understanding of how AI and automation can be integrated into everyday workflows, with a focus on scalable implementation for SMPs

Global Practices & Emerging Technologies

Explore how leading international professional firms are leveraging AI and emerging technologies to enhance service quality, efficiency, and decision-making.

Actionable Firm-Level AI Roadmap

Leave with a structured roadmap to assess opportunities, manage risks, and implement AI within your firm's existing methodologies and workflows.

Future-Ready Professional Practice

Develop the knowledge and capabilities to confidently adopt AI, enhance productivity, protect profitability, and future-proof your practice in an evolving professional landscape.

Practical AI Tools & Real-World Use Cases

Discover practical AI tools and real-world applications that can automate routine tasks, improve decision-making, and streamline everyday professional workflows.
